Skills

🔧 **Web Application Design**

Advance

HTML5, JavaScript, CSS,
Python, PHP, MySQL, Render

🎨 **Graphics Software**

Advance

Adobe Illustrator, Adobe
Photoshop, Figma, Canva,
BlackBox, Adobe Dreamweaver

🛡️ **Cyber Security**

Intermediate

Kali Linux, Burp Suite,
Wireshark, Nmap, Metasploit,
OSINET Framework, Reverse
Shell, Steganography

👨‍💻 **Software Development**

Advance

Android Studio, PostmanAPI,
Arduino IDE

Career Objective

Computer Science & Engineering student specializing in **Cyber Security, Ethical Hacking, and Web Development**, with growing experience in **Machine Learning**. Hands-on with CTFs, vulnerability research, and secure coding practices, backed by real-world projects including a cybersecurity learning platform and a personal portfolio site. Seeking to apply this cross-disciplinary skill set — **security-first thinking**, full-stack development, and ML fundamentals — in an internship or entry-level role where I can contribute to building safer, smarter systems.

Educational Background

Notre Dame University Bangladesh

Dhaka, Bangladesh

Bachelor's in CSE

September 2022 — Present

Government Laboratory High School & Collage

Group - Science

H.S.C. • 5.00

2019 — 2021

Motijheel Govt. Boys High School

Group - Science

SSC • 4.78

2009 — 2019

Experience

NDUB CSE FEST'26

Head of Technical Team

Dhaka, Bangladesh

May 2026

Led technical operations for NDUB IUPC-2026, coordinating with problem setting partner Shohoz Coding and backend IT teams to prepare the contest environment.

Set up the competition room and system architecture, and led volunteer coordination for a field of 86 participating teams.

Notre Dame University Bangladesh Computer Club

Graphics & Web Designer

Dhaka, Bangladesh

January 2023 - June 2026

Designed digital visuals, event branding, and social media content for university-wide events and official Computer Club branding.

Built responsive, user-friendly web interfaces using HTML/CSS across 2+ years of active design work

EDGE Training Program Bangladesh

Android Developer Student

Computer Council, ICT Division

February 2024 - May 2024

Completed hands-on team-based android mobile application project work through the EDGE program.

Projects

Student Performance Prediction & Academic Advisory June 2026 - Present

Live - *Machine Learning, Explainable AI (XAI)*

Built an ML-powered system that predicts student academic performance and generates actionable improvement suggestions using SHAP/LIME for explainability.

Deployed live with a human-in-the-loop feedback mechanism for continuous model refinement

SpyderCEHub November 2023 - Present

Live - *Web Development, GitHub API*

Built a cybersecurity learning platform covering recon, exploitation, web hacking, and privilege escalation, with a resource fetcher built on the GitHub API

Failover Network Using Redundant Paths May 2025

Networking & Cyber Security, Cisco, STP, HSRP

Designed a highly available network topology implementing Spanning Tree Protocol (STP) and Hot Standby Router Protocol (HSRP) for automatic failover.

Documented architecture and configuration in a full technical report

NDUB Student Management System April 2024 - Present

Full-Stack Web App

Built a web application enabling students and admins to manage academic data, results, and courses efficiently

Egg Drop Game February 2026 - Present

Live - *C++, OpenGL, Glut*

Built a 2D arcade game with real-time collision detection and lives management using OpenGL/GLUT

Flappy Bird Game September 2023

A Java-based GUI project where users can play by clicking a Play button, opening a new game window.

Certifications

Certificate of Appreciation – Lead Organizer, NDUB CSE FEST 2026

15–16 May, 2026

Department of CSE, Notre Dame University Bangladesh, in association with NDUB Computer Club

Certification of Mobile App Development 16 March, 2025

EDGE project of Bangladesh, Computer Council, ICT Division
